Washington, D. C.

To our thousands of Customers and Friends we send this Catalogue. We wish it were possible to visit and talk with each of you, but this being impossible, we are asking you to accept this little booklet as our salesman. We hope, although we are just growers of quality nursery stock and not salesmen, that we might interest you in something that will be very valuable to you in the future. We will describe the different nut and fruit trees so you will be able to select what you want and also the trees that experience has proven best for you. Why should you take a chance? We list only those that experience has proven to be the very best.

We believe from the fact that we have grown from a small investment to one of the largest nurseries by selling year after year to the same Customers proves that we have at least partly accomplished what we strive most to do—to give our Customers the best trees Time, Experience, and Money can grow.

We guarantee all stock you purchase from us to be high-grade, first class in every respect. We guarantee every tree to be true to name and every pecan tree to have a good lateral root system. If you should be dissatisfied with any tree or plant you purchase from us, you may return the unsatisfactory ones at once and we will immediately replace them with others that are satisfactory, or refund your money.

Texas Pecan Nursery

TREES

God alone can make a tree, but the TEXAS PECAN NURSERY CAN MAKE THEM PROFITABLE for YOU because:

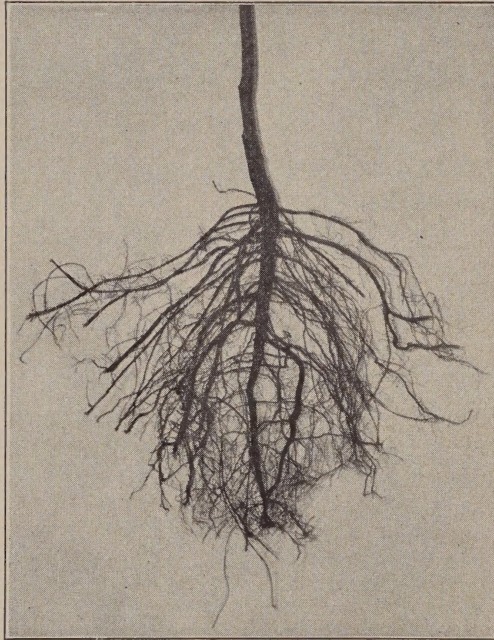

1. OUR trees are acclimated and adapted to your locality.
2. OUR trees are each one graded separately by hand assuring you a grade A plant in every respect.
3. OUR nursery is noted for the Lateral Root System that we developed. This system enables us to furnish you with trees that will live, grow and produce better than trees supplied by other nurseries.
4. OUR trees are dug by hand to preserve the lateral root system. Most nurseries dig trees with a digging machine to save them money and time but it does not save the part of the root system that you must have in order to get your trees to live.
5. OUR nursery is reliable. Trees ordered from us will be true to name and tagged so you will know that you are getting just what you want and not what we have the most of.

THINGS OUR TREES WILL DO FOR YOU

1. OUR trees will pay your taxes. By the time your trees are ten years old you will not worry about getting your taxes paid. Not for one year but a pecan tree will produce profitably for 75 to 100 years.
2. OUR trees will build homes. An orchard of papershell pecans 20 year old is worth \$1000 per acre. How much would you make off of an orchard of 100 acres?
3. OUR trees will educate your children and grandchildren. You will not have to start over again each year with pecans as you would cotton and corn. Once you get them planted your children and grandchildren will reap the benefit of the same tree year after year.
4. OUR trees will provide security for old age. After you have reached the age that you are getting a little slow you will not find it necessary to worry about providing for yourself and family, if you will plant pecan and fruit trees now.
5. OUR trees will help maintain health. Help in the National Defense program by planting enough fruit and nut trees to supply your family with the proper amount of vitamins.

Our Root System

All Measurements Are From the Ground Up and Not From the Roots

The root system we have developed assures you success because a good lateral root system is the Life and Making of a pecan tree, the more Lateral Root a tree has, the more feed roots it will have, and the more feed roots a tree has, the more plant food and moisture it can gather; and the more plant food and moisture a tree can get, the better it will live, grow, and produce. Don't you believe it will pay you to buy well-rooted trees?

**THE ORIGINATOR AND GROWERS OF
BETTER ROOTED TREES**

How to Select the Pecan Varieties Best Suited to Your Soil and Climate

Zone No. 1—Not recommended for commercial planting. We recommend for home planting in east part: Stuart, Success, Moore, Money Maker; in west part: Burkett, Success, Schley.

Zone No. 2—Only the Eastern Varieties recommended: Success, Moore, Schley, Delmas, Money Maker, Stuart. We would add Burkett for hill land in the west central part. Success, Moore, Money Maker, Schley, and Stuart should be used for bottom lands. Plant Delmas on upland. Stuart seems to be especially adapted to extreme east part of this section and bottom lands in the western part. These are known as tested Eastern Varieties.

Zone No. 3—Both Eastern and Western Varieties recommended—Western Varieties for west part and uplands; Eastern Varieties in east part and lowlands. Burkett, Western Schley, Texas Prolific, and Halbert are tested Western Varieties.

Zone No. 4—Plant Western Varieties only.

Other States—Continue zone lines northwest about 100 to 125 miles, planting Eastern Varieties in the lower altitudes and river bottoms of Zone 3, and the Western Varieties on the uplands and in the higher altitudes of Zone 3. Plant Western Varieties on all lands west of dividing line between Zones 3 and 4.

Extract from TEXAS Department of Agriculture Bulletin No. 111

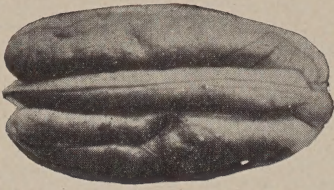

"THE PECAN IN TEXAS"

"Five important physical factors enter into successful pecan orcharding: good soil; thorough preparation; good trees; good cultivation; and the proper varieties. Equal in importance, perhaps, to all factors combined, is the man behind the job; for upon his efficiency depends almost entirely the success of the enterprise.

"The trees should be bought from reliable nurserymen, having a reputation for fair dealing. If the nurseryman grows his own trees on his own ground, the chances are better for the purchaser to get the varieties preferred.

"The cost of care of poor trees is the same as that expended for good trees. The higher price paid for good trees is cheaper in the long run than the smaller price for the purchase of poor trees."

Buy From Reliable Nurserymen

EASTERN VARIETIES

STUART—The Stuart comes nearer being suited to all sections of the country and all soils than any other variety. It is a very old variety and well known. A large nut, fills well, medium to heavy bearer, early to ripen, and about 48 to 50% kernel.

SUCCESS—A large and strictly first-class pecan, strong growing tree, early bearer; thin shell; cracks well and the meat can be taken out in halves. Ripens ten days later than Stuart. 38 to 40 nuts per pound and is 52% kernel.

SCHLEY—Unsurpassed in quality and in flavor. An ideal fast growing pecan and tree with beautiful foliage. The nuts sell from 5 to 10 cents more per pound than others. Large size—50 per pound. The shell is very thin and fills well. About 60% kernel.

MOORE—A very fast growing tree, and an amazing producer. Bears early and heavy; ripening early enough to be the first on the market. About 65 per pound, and 40 to 50% kernel.

DELMAS—A very vigorous growing tree and one of the best for shade purposes. It is a heavy bearer; large nut 40 to 45 per pound; 48% kernel. Use this variety in your landscaping.

MONEY-MAKER—Especially suited to planting in the Northern range of the area—(adapted to Southern varieties). Medium size, plump kernel, fair quality, 46% kernel.

MEYHAN—A very vigorous growing tree with splendid long slender nuts. It is strictly a first-class pecan with a large percent kernel. It is one of the largest pecans known.

INSTRUCTIONS ON PLANTING

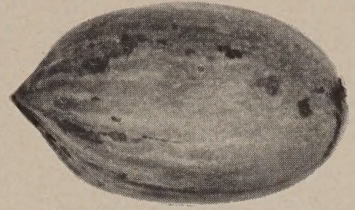

For a large commercial planting we recommend the smaller trees. The 3 to 4, 4 to 5, 5 to 6, 6 to 7 ft. trees are ideal. They live better and grow off faster than the larger ones. However, for yard planting the larger ones are satisfactory.

Pecan trees should be planted about 50 feet apart, 17 trees per acre. In home use where the soil is moist, 10 to 12 feet apart is all right. This planting should be done from November through March.

Our Nursery is located 12 miles west of Tyler on Highway 31 at Chandler, Texas. Day Phone: Tyler, 269—Night Phone: Chandler, 59.

87,289,000 Pounds of Pecans Produced and Used in 1941.

There Is Always a Market for Pecans

WESTERN VARIETIES

BURKETT—Large—40 per pound. Thin shell; plump rich kernel. A good pecan for the west; and also doing well on high ground in East Texas. 55% kernel.

WESTERN SCHLEY—Similar to Eastern Schley, except it thrives better in the drier climate and higher altitudes of the West. Early and heavy producer; about 56 per pound, 60% kernel. Moderate early ripener; vigorous grower; good yard tree.

TEXAS PROLIFIC—A large size nut; shell medium thick; rich sweet plump kernel. It is a heavy producer. 56% kernel.

OKLAHOMA—Mother tree is at Ardmore, Oklahoma. Large nut with shape of Delmas. Thin shell; 40 to pound; heavy producer; matures rather late 46% kernel.

HALBERT—Young trees inclined to be crooked, but get straighter as the trees grown older. Very early and prolific bearers. Medium size nut; very thin shell; excellent flavor. A good tree for black, waxy land. Should not be set in Mississippi, Louisiana, East Texas, or Eastern Oklahoma. 61% kernel.

**NO ORDERS ACCEPTED FOR
LESS THAN**

\$1.00

PLANT MORE THAN ONE VARIETY

Whether you consider planting 50 trees or 5 acres, be sure that you plant two or more varieties, thereby insuring against the loss of a crop in case weather conditions are unfavorable at blooming time. Different varieties blooming at slightly different times safeguard your crop by better pollination.

Walnuts

English Walnuts

WILSON'S WONDER

Produces enormous size nuts; rough shell. Bears very young and heavily. Nuts bring fancy prices.

Black Walnuts

THOMAS

Early and prolific bearing; large, thin shell nuts, with kernels in halves. Adapted to nearly all types of soil. It will grow in practically all parts of the United States. Tree is very hardy and makes a beautiful shade tree.

Our Special Better Rooted Trees Grow Faster, Bear Younger and Produce Heavier Than Ordinary Trees.

Japan Persimmons

Japan Persimmons are adapted to the South. They thrive in land suited to cotton. The trees are subject to very few diseases and do not require much care. The Trees when covered with large persimmons will add much to the beauty of your home.

TANE NASHI—Fruit large to very large; roundish conical; seedless; color, light orange-red, with firm yellow flesh. Ripens in October.

EUREKA—Medium-size oblate, tomato-shaped fruit. Originated in Texas. It will withstand severe drouth conditions and low temperatures. Ripens in November.

YEMON—Large; rather flat; yellow, with orange flesh; seedless; good flavor and good bearer. The best variety for the market. It ripens late.

OUR OWN PEACHES

You may be able to find a substitute at any Nursery, but we are the only Company having the authority to offer you the Fair's Beauty and Golden Beauty.

FAIR'S BEAUTY—This is a very delicious variety, splendid for eating direct from the tree. There is no other peach as good for canning. It is yellow; semi-cling; large to extra large. Ripens June 15th to July 4th.

The Fair's Beauty brings tip-top market prices because of its high quality and early ripening date. There is no other person who has the authority to grow this peach tree for sale. Trade Mark No. 274380.

GOLDEN BEAUTY—This is a large, yellow freestone, with beautiful red cheek. It ripens from June 20th to 25th, three weeks earlier than Elbertas. We have tested this peach for eighteen years and are thoroughly convinced that it is one of the very best early ripening yellow freestone paches. It is excellent for market and shipping. Trade Mark No. 274836.

32 YEARS OF SATISFACTORY SERVICE

PEACHES

From May Until October

Standard Varieties

MAY RIPENERS

MAYFLOWER—A "red-over-all" peach; handsome, splendid quality. Should be in every home orchard; sells readily on the market. Ripens in May.

EARLY WHEELER—Sometimes known as the Red Bird Cling. Large fruit, clingstone, beautiful, clear creamy-white. Ripens last of May and first of June.

JUNE RIPENERS

ARP BEAUTY—Yellow, with bright red blush; firm, juicy and excellent peach of unusually good flavor; semicling. Ripens June 1st.

MAMIE ROSS—Large, white, cling peach; red cheek. Nice large fruit that markets early and usually brings a good price. Ripens June 5th to 15th.

BELLE OF GEORGIA—Freestone, white flesh, red cheeked; very large and firm. Excellent flavor. Good shipper. Tree is rapid grower and very productive. Ripens latter part of June.

HALE HAVEN—Freestone, tough skin, very highly colored and well adapted to large commercial plantings. Tree vigorous, hardy; fruit large; good shipper. Ripens about two weeks earlier than Elbertas.

EARLY ELBERTA—Freestone, clear yellow with blush; fine grained and sweet. Tree a strong grower; ripens about one week earlier than Elberta.

JULY RIPENERS

J. H. HALE—Large; yellow overlaid with bright carmine; flesh, deep yellow; firm, fine grained; delicious flavor; freestone. Ripens in July.

ELBERTA—Most widely known of all peaches. Very attractive appearance; large; deep yellow, splashed crimson; perfect freestone. Trees vigorous, highly productive. Ripens July 5th to 20th.

CHINESE CLING—Skin cream with short fuzz. Mottlings of dull red, covering one-third to one-half of surface next to stem. Flesh white with little red at surface next to seed. Tender and very juicy.

AUGUST RIPENERS

AUGBERT—A superb freestone, similar to Elberta, but in many respects superior. Tree vigorous, prolific; very valuable. Ripens in August.

OLD MIXON CLING—Large, round; white with distinct red blush; flesh, white, next to seed; firm; excellent quality. Ripens in August.

RED INDIAN—Old Fashion Indian Peach that is so good to eat; splendid for pickling and preserving. If you

want the best peach in the world for preserving get the Indian peach. Ripens in August.

LEMON CLING—Medium size; yellow meat; Clingstone. Extra well suited for sweet pickles. Ripens in August.

SEPTEMBER RIPENERS

SEPTEMBER ELBERTA—A wonderful, yellow, freestone peach with delicious flavor. It is a good peach for the late market; ships well. Ripens in September.

OCTOBER RIPENERS

STINSON OCTOBER—One of the best late peaches. Large, oblong; white, red cheek; good flavor; clingstone. Ripens in October.

Our peach trees are grown from buds carefully selected from early bearing trees that are true to name. Why take the risk with others, when we guarantee every tree sold to be just what you order.

We Feature the Famous

Stubenrauch Peaches

These Peaches are very popular because they are frost resistance, vigorous and have fine quality of fruit. Mr. J. W. Stubenrauch of Mexia, Texas, was awarded a Medal for the great work that he did in breeding these peaches.

FRANK—Clingstone. One of our best peaches, Ripens August 10th to 15th. Good flavor; large yellow peach, that always demands a good price. Some of Mr. Stubenrauch original trees have produced continuously for 37 years without the loss of a crop. Bears very young; has good crop at 2 years old. One of the best for home and market use.

TENA—Large; ripens Aug. 1 to 10th; freestone; yellow and red meat, showing traces of Indian blood; extra good for canning. The high-class yellow freestone beats the Elberta to market.

BARBARA—Freestone; ripens Aug. 15th to 30th; a Bell October and Elberta Cross; round, large, excellent quality; extra fine for canning. It, as the other Stubenrauch peaches, is frost resistant.

GRAPES

FOUR EXCEPTIONALLY GOOD VARIETIES

Every home needs at least 24 grape vines. Or an average of 4 grape vines per member of the family, in order to have an adequate supply for Jelly, Jam and Juice. You will be happy to have grapes for decorations and center-pieces for the dining table. Grapes will add much to the beauty of your back yard or fence row.

MOORE'S EARLY—Is a very large, early; black; fine quality, good market grape. The vine is very healthy and prolific. Grapes ripen last of May or early June.

CONCORD—This is the best known of all grapes. It is large, black and suited for table or market use. It ripens in July.

NIAGARA—The Niagara is a large, greenish-white, semi-transparent grape of good quality. This grape does well over a wide range of territory. Ripens in mid-season.

CARMAN—One of our favorites. It is very prolific. It is splendid for table or for wine, grape-juice, preserves and jelly. Cluster very large, sometimes weighing two pounds; shouldered; very compact. The grapes are medium size, black with a tough skin. Pulp is meaty, firm and tender when fully ripe. Splendid quality. Ripens in July.

There are two products that will grow anywhere in the world in some quantity. They are Rye and Grapes.

APPLES

Our highly recommended fruit for your health—"An apple a day will keep the doctor away."

EARLY HARVEST—Medium, bright straw color; tender sub-acid; fine dessert and cooking apple. Ripens in June.

RED JUNE—One of the best early apples for table and market. Medium size; deep red in color. The flesh is white. Ripens in June.

YELLOW TRANSPARENT—Widely known and well liked. It is large, transparent, yellow crisp, sub-acid, very fragrant, tender and excellent for cooking. The trees bear young and is of very good quality. Ripens in June.

STAYMAN'S WINESAP—One of the oldest American apples and still increasing in favor. Its size, color and quality has given it the well deserved popularity it will always enjoy. It is medium size, vivid red and one of the best known keepers. Ripens in September.

YELLOW DELICIOUS—Beautiful golden yellow skin, firm textured flesh. Tree is thrifty and extremely productive. Yields a heavy crop while very young. Ripens early in October.

GRIMES GOLDEN—Good, golden yellow apple; an old favorite over the United States. Trees very productive, and long-living. Ripens in early fall.

DELICIOUS—Beautiful, red-striped winter apple. Good quality; fine flavor. One of the best known. Every home should have a few. Ripens in October.

BERRIES

AUSTIN DEWBERRY

Probably the best commercial variety for Central and North Texas. Very large, fine flavor and especially good for jams and jellies. A vigorous grower; very prolific. Ripens in May and June.

BOYSEN BERRIES

This berry looks like a Youngberry and has very similar flavor. Fruit is very large. Ripens in June.

MCDONALD BLACKBERRY

One of the best blackberries. It is very hardy and produces heavy.

YOUNGBERRY

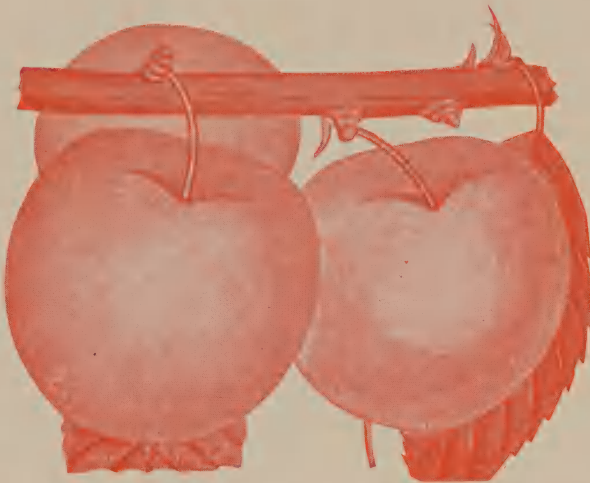

A wonderful berry. Produces by crossing the Loganberry and the Dewberry. An exceptionally heavy producer. Berries dark, wine red, of extraordinary flavor, tender, juicy and rich, with no hard core.

DALLAS BLACKBERRY

Very vigorous. Fruit large, black, firm, juicy, sweet. Mid-season ripener.

PLUMS

Pleasure and profit from Plums. They are beautiful, delicious, and easy to sell.

SIX WEEKS—Earliest of all plums. Large; oblong; bright red; flesh pink; seed small. Ripens May 20th to June 1st.

METHLEY—Handsome tree; fruit large; golden red. It is a very good producer. Ripens May 25th.

BRUCE—Very red and productive. It is a good plum for commercial use. It is well suited to North Texas, the Panhandle and Oklahoma. Ripens about June 1st.

RED JUNE—The skin, purplish red; the flesh, yellow. It is very firm; somewhat coarse-grained. Very delicious for table use. Ripens about June 5th.

AMERICAN—Tree very thrifty, symmetrical, spreading, and will produce successfully anywhere. It fruits very young, always having a heavy crop. This wonderful plum should be in every orchard. It is a golden yellow with red cheek. Ripens about June 15th to 20th.

GOLD—Nearly transparent; golden yellow; wide range; sure bearer. It is very similar to the American but larger and sweeter. Ripens the last of June to 1st of July.

BURBANK—This plum is extremely popular in all sections. It is very large, richly colored, red mottled, dotted with yellow, and a heavy bearer. Ripens in July.

DAMSON—This is the old-fashioned blue Damson. Known for the fine jelly and preserves it makes. Ripens in late summer.

FIGS

Our Fig Trees have delicious fruit on them the first year. A few of these trees will supply you with all the figs your family will need for home use.

TEXAS EVERBEARING

This is a wonderful new fig—one that you should by all means include in your yard planting. It bears very young, and is prolific and a good grower.

CELESTIAL

This is the little blue fig that is so popular. It is very sweet and hardy. Ripens in July.

BROWN TURKEY

It is a large, brownish-purple, and sweet fruit. Hardier than the Magnolia. Ripens about the last of June to 15th of July.

MAGNOLIA

The Magnolia produces a large brownish fruit that is rich and sweet. It will bear the first year and ripens from June until frost. These are ideal for home use.

"PLANT EARLY FOR BEST RESULTS—BETWEEN NOVEMBER AND APRIL"

PLUM CHERRY

Each year we sell more and more of these trees. I am sure that you will want several in your home orchard.

COMPASS—This is a cross between a plum and cherry, having the best qualities of each. The tree is a vigorous grower, hardy, prolific, and bears extremely young. The fruit is medium size, of a dark red color. Ripens in June. Makes excellent preserves.

OPATA—The Opata is a very beautiful tree and will add color to your lawn as the blooms are beautiful and fragrant. The fruit is medium size and of fine flavor. It is purplish-red color with greenish meat; clinging to seed. Ripens last of June.

PEARS

There is always a market for good choice fruits—especially pears. Our trees will give you fruit that will bring high prices on any market.

DOUGLAS

Our Douglas pear is one of the most famous for its early and heavy bearing. The fruit is large, slightly oblong in shape, creamy-white with red cheek. Douglas is one of the best eating pears on the market and is sold at fancy prices. These big soft, juicy, delicious pears are good to eat right off the tree.

LE CONTE

Large; pyriform; smooth; pale yellow. Good quality when properly ripened. Begins to bear when five years old. Ripens July 20th to last of August.

GARBER

Fruit large to very large; skin yellow with light brown cheek. Fine for cooking. Ripens in late September.

KIEFFER

Best variety for the Southwest. Will bear very young. The tree is vigorous and very prolific. The fruit is very large; yellow with brown cheeks. It is the best for cooking and market. The Garber and Kieffer are very much alike. Ripens in October.

BARTLETT

Everyone is acquainted with this large yellow pear. Fruit is very rich and highly aromatic. Trees grow dense and of even conical shape. Very popular. Ripens August.

CHINESE SAND

Called "Pineapple Pear." Valuable for the South for canning. Flesh coarse, about the quality of Kieffer. Tree good grower; not subject to blight. Ripens in August. Best suited to that section within 100 to 150 miles of the Gulf Coast.

Rose Bushes

MANY STANDARD OR WELL KNOWN
VARIETIES

We guarantee to furnish good plants, and all orders are shipped subject to approval upon arrival. We cannot guarantee all plants to live and grow, however.

Prices of Standard Roses, F. O. B. Tyler

Each-----	\$0.25	Dozen-----	\$2.50
-----------	--------	------------	--------

CHARLES K. DOUGLAS—HT. Fine, long pointed buds, opening to large flowers of striking crimson-scarlet. Abundant healthy foliage.

E. G. HILL—HT. Very beautiful, dark red buds which open to immense, dazzling scarlet flowers. Fragrance of the old time roses.

ETOILE DE HOLLANDE—HT. Brilliant red blooms of magnificent size, perfect in half-open state; fragrant, healthy, free flowering.

RED RADIANCE—HT. Big, globular blooms of deep rose-red on strong canes. The plant blooms freely until frost. Foliage excellent.

FRANCIS SCOTT KEY—HT. Very large, light crimson buds and massive, very double. Slightly fragrant. Flowers in great abundance. Has good foliage and is quite hardy. Does well in the South.

EDITH NELLIE PERKINS—PH. The open bloom is a delightfully shaped flower of two contrasting tints. The plant stands up vigorously. Provides and abundance of blooms for cut-flowers.

RADIANCE—HT. Brilliant rose-pink buds, opening to well formed, shining, globular flowers, with lighter tints on reverse of petals; very fragrant. Plant of splendid growth; wonder bloomer.

ROSLYN—HT. Charming, pointed buds of golden yellow and frilled, open flowers of buttercups hue strengthened with orange. A remarkably free bloomer.

ETOILE DE FRANCE—HT. One of the really fine old-fashioned, clear crimson Hybrid Teas, with large double, star-shaped flowers, borne singly on long stems. Bushy bedding variety.

MARY, COUNTESS OF ILCHESTER—HT. Large double, full, cupped blooms of deep rose-pink; fragrant. Plant bushy; blooms freely; very hardy. Fifty-two petals.

EDITOR McFARLAND—HT. A deep, sparkling pink rose of the Lady Ashtown type; borne with liberality by vigorous, upright bushes. The Editor McFarland is the best pink rose for the South.

MARGARET McGREDY—HT. It is almost impossible to describe the extraordinary vividness of this scarlet-orange or brick-red flower. We recommend it for mass planting.

BETTY UPRICHARD—HT. Copper-red buds, opening to semi-double, large flowers of brilliant orange-carmine on outside of petals. The Betty Uprichard possesses a very spicy fragrance.

LADY HILLINGDON—T. Slender, pointed buds and elegantly cupped flowers of deep saffron-yellow; fragrant; erect; perfect foliage. Needs some shade in hot weather. Free flowering.

LUXEMBOURG—HT. Yellow, shading to copper at center. Stiff, upright stems. Large flowers.

AMI QUINARD—HT. Dark yet brilliant crimson rose. Large semi-double flowers of velvety-scarlet sheen. Vigorous plants. Produces in steady succession throughout the summer.

ANTOINE RIVOIRE—HT. Flower is pale silvery pink, often shaded lilac. Of medium size and fragrant. Foliage small and dark. Free blooming in spring and fall. Seventy petals.

KAIERIN AUGUSTE VIKTORIA—HT. Well formed, creamy buds, which develop slowly to snowy white blooms. Fragrant; moderately vigorous; hardy ninety-eight petals.

PRESIDENT HERBERT HOOVER—HT. Cross of Sensation and Souvenir de Claudius Pernet. Large, cerise-pink, flame, scarlet and yellow bloom; thick, broad petals; fragrant.

TALISMAN—HT. Brilliant red and golden buds that open to beautifully shaped blooms of scarlet-orange and golden yellow. Vigorous; tall; blooms constantly. Thrives almost everywhere.

AMERICAN BEAUTY—HP. Large, globular buds and deep vinous, crimson flowers; intensely fragrant; borne freely at frequent intervals on strong stems over a long season.

JONKHEER J. L. MOCK—HT. Carmine buds of gigantic size, opening slowly to enormous, deep carmine-pink blooms with inner surface silvery rose. The stems are strong; bush is vigorous.

DAME EDITH HELEN—HT. A superb rose of the exhibition type, producing huge, shapely buds and very large, high-centered blooms of clear pink.

GOLDEN DAWN—HT. Fully double, deep yellow in bud, occasionally tinged with bronze and opening to fine, richly fragrant, pale lemon-yellow flowers of great size and lasting quality.

MRS. PIERRE S. DUPONT—PH. Well shaped golden yellow flowers resembling those of the lovely old Mme. Butterfly in form. Plant compact and leafy. Blooms with unceasing abundance.

SOEUR THERESE—HT. Unusual in color, size of flower, and vigor of plant. Color is rich golden yellow, changing to cadmium-yellow; at edges of petals, small spots or splashes of carmine.

SUNBURST—HT. A beautiful bright yellow rose with a pronounced orange tint at the center; the flowers are well formed, have a delightful, though not strong fragrance, and are borne freely on straight stems. The plant must become thoroughly established before it blooms freely.

IDEAL—(Polyantha.) This rose will give you a great mass of dark scarlet flowers with almost black shadings. The blooms are double, of medium size, and borne in enormous quantities.

CECILE BRUNNER—(Polyantha) Also known as "Sweetheart Rose." The blooms which are small, delicate, and graceful, are light pink with a suffusion of yellow at the base.

GOLDEN SALMON—(Polyantha.) When in full flower this variety makes a gorgeous show, with a multitude of blazing orange bloom, and score of orange-scarlet buds.

CLIMBING ETOILE DE HOLLANDE—A climbing form of the well known bush variety.

CLIMBING TALISMAN—Cl. PH. A climbing sport of the bush variety described herein.

PAUL'S SCARLET CLIMBER—HW. Bright scarlet blooms of excellent shape and moderate size, in small trusses. Foliage good. Moderate growth; blooms liberal in early season.

CLIMBING PINK RADIANCE—Cl. HT. Climbing form of the well known bush variety described herein.

CLIMBING RED RADIANCE—Cl. HT. A strong climber, in bud and bloom like the bush Red Radiance described herein.

ORNAMENTAL SHRUBS

BAKER'S ARBOR VITAE—A compact pyramidal plant. Foliage bright green without yellowish tinge. Excellent for specimen or group planting, producing a symmetrical, tall, well-shaped plant.

2 to 3 ft.-----\$1.50 3 to 4 ft.-----\$2.00

BERKMAN'S GOLDEN ARBOR-VITAE—Of dwarf, very compact growth, almost globular in shape as it attains maturity. Foliage yellowish green, tipped with pure gold in spring and early summer.

2 to 3 ft.-----\$1.50 3 to 4 ft.-----\$2.00

PFITZERIANA JUNIPER — Doubtless the most popular of the low growing, spreading Junipers. Perfectly hardy in practically all locations, and may be kept pruned.

2 to 3 ft.-----\$1.50 3 to 4 ft.-----\$2.00

WAXLEAF LIGUSTRUM of erect, branching habit. Leaves dark green, thick and glossy. Medium growing and suited for group or base plantings.

2 to 3 ft.----- .50 3 to 4 ft.----- .75

NANDINA—An erect growing shrub with bamboo-like shoots. Foliage finely cut, brilliant colored, varying from dark green to red and coppery tones. Flowers small, followed by brilliant red and yellow berries in top of plant in fall. Prefers well-drained soil, is quite hardy.

2 to 3 ft.-----\$1.50 3 to 4 ft.-----\$1.75

ABELIS GRANDIFLORA—A most satisfactory plant for both flowers and foliage. May be kept to any desired height by pruning. The branches are graceful; the foliage rather narrow, glossy, dark green above and reddish gray beneath. From May until frost the plant is almost covered with delicate white fragrant flowers.

2 to 3 ft.----- .75 3 to 4 ft.-----\$1.25

LOMBARDY POPLAR—A wonderful effective tree when properly used in plantings. A very rapid grower, and it becomes more beautiful with age. Grows tall and slender, making a true column.

8 to 10 ft.----- .60 10 to 15 ft.-----\$1.00
(Bare Rooted)

EUONYMUS—A waxy, glossy hardy evergreen that may be sheared or will cling to walls.

2 to 3 ft.-----\$1.00 3 to 4 ft.-----\$1.50

CEDRUS DEODARS—A pyramidal plant growing to a great height. Foliage bluish green with spreading branches. Beautiful, hardy and should be in every planting.

2 to 3 ft.-----\$2.00 3 to 4 ft.-----\$2.50

ITALIAN CYPRESS—A tall narrow, columnar growing tree with soft, dark green foliage. Will attain 25 feet.

2 to 3 ft.-----\$1.50 3 to 4 ft.-----\$2.00

SPINY GREED JUNIPERUS—Spiny, compact, blue-green foliage, narrow columnar grower.

2 to 3 ft.-----\$1.25 3 to 4 ft.-----\$1.75

GARDENIA—Dense rounded growth; glossy, shining leaves; wasp-like, white fragrant flowers.

12 to 15 in.-----\$1.00 2 to 3 ft.-----\$1.50

CHERRY-LAUREL—Upright grower; light-green, glossy foliage.

12 to 15 in.-----\$1.00 2 to 3 ft.-----\$1.50

If we do not have listed what you want, send us your want list and we will be glad to quote prices on them.

FLOWERING PEACH—Pink

A beautiful ornamental tree which in the Spring is covered with immense flowers. It blooms much more profusely than the fruiting peach and the flowers are much larger.

PRICES: 3 to 4 ft.—1-9—each-----50c From 10-50—each----- 40c

Nuts, Fruits and Beauty

Every home owner who does not plant fruit and nut bearing plants in the home-planting is overlooking a factor that could be very valuable to him and his family. Your homesite is usually the best choice on the farm for growing good fruit and nut trees because you choose good well drained land on which to build.

Pecan trees afford good shade and beautify your lawn. A ten year old pecan tree will produce from 75 to 125 lbs. of pecans each year. The crop will increase and the tree will grow more attractive with every year.

Fruit trees are always needed to supply fresh fruit for the family as well as add to the family income. A few fruit trees will lend to the appearance of any back yard. What is more beautiful that a fence row covered with grape vines?

Black walnuts and practically all other nut trees can go in the yard almost any place. Walnut trees do not require much care or attention. Nut trees do not interfere with growth of grass as much as other shade trees.

Check your order and see if you have selected plants that will supply you with **NUTS, FRUITS and BEAUTY.**
